Ultravation.com

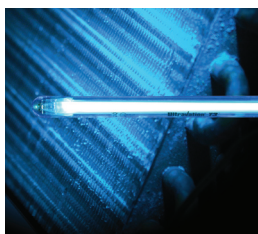

Bio-clogged HVAC cooling coil

Did you know?

Your HVAC system can become the source of high concentrations of allergens from internal bio-growth.

In addition, even a thin bio-film measuring just a few thousandths of an inch on a cooling coil can reduce HVAC efficiency by 30% to 50% and cause musty HVAC odors.

UV clean, unclogged efficient HVAC cooling coil

Without UV, an HVAC system can not only distribute cooled air, it can also distribute airborne microorganisms throughout a home, including bacteria, viruses and allergens.

UltraMAX EZUV
improves indoor air and
saves money!
Ultravation® patented
technology will improve
HVAC performance,
regardless of the severity
of the problem.

Ultravation®

Ultravation®
UltraMAX EZUV™
Signature Series
Germicidal Light for HVAC

- **UV stops bio-growth including fungus and bacteria** laden sludge that clogs HVAC drain pans and drain lines.
- **Allergy relief!** Reduces or eliminates allergens generated inside the air conditioner.
- **Prevents HVAC “dirty-sock” smell.**
- **Optimizes cooling efficiency!** UltraMAX EZUV prevents the bio-film that insulates cooling coils and degrades cooling making your HVAC system work harder. Increasing efficiency reduces HVAC wear and tear.
- **Reduces electricity costs!** With UltraMAX EZUV your HVAC system operates at peak efficiency 24/7.

For fresher, healthier, more allergen-free air

Installation by HVAC / IAQ professionals

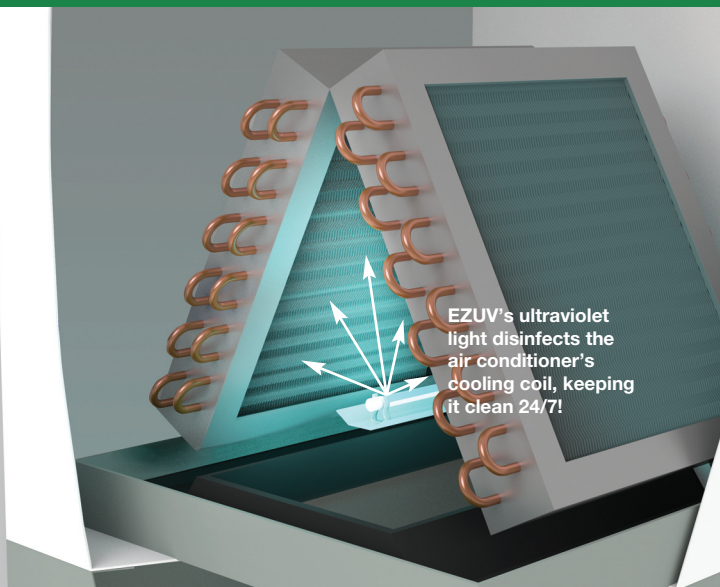

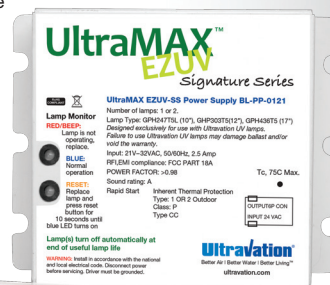

UltraMax EZUV™ is an efficient and cost effective way to improve indoor air and optimize your HVAC system’s efficiency. For best performance, installation by indoor air quality (IAQ) experts is essential. Visit Ultravation.com to find an **Ultravation Authorized Contractor** who has the training to professionally evaluate your home’s HVAC system for UV. They’ll advise on the best model and placement for your home.

Ultravation T3™ UV lamp optimizes UV intensity. T3 provides 40% more UV without any increase in power consumption!

With 1-year UV lamp warranty

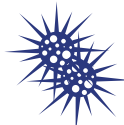

EZUV's ultraviolet light disinfects the air conditioner's cooling coil, keeping it clean 24/7!

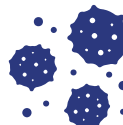

Ultraviolet light (UVC) is germicidal and will control surface and airborne...

Bacteria & Viruses

Allergens

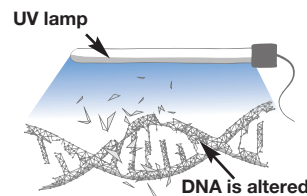

HVAC Biogrowth

Independent testing confirms **Ultravation UV lights kill 99.99% of SARS-CoV-2** — the virus that causes Covid-19 — **in 2 seconds!***

*Read the complete test reports at Ultravation.com

How UV works
 UV rays penetrate the membrane breakdown the DNA of microbes, rendering them harmless.

Applications:

- Residences
- Offices
- Restaurants
- Schools
- Day care centers
- Doctor's offices
- Veterinary clinics
- Any air handler or furnace up to 5 ton

EZUV Features

Whole house air quality improvement

Stops HVAC sourced allergens and pathogens

Keeps HVAC coil clean 24/7

An always-clean coil MAXIMIZES energy savings

Electronic lamp monitoring

Keeps a check on lamp operation and reminds when UV lamp needs to be changed.

Long-Life T3™ UV Lamp

Up to 18,000 hours before a new lamp is required

Low energy use

16 watts (12" lamp), 20 watts (17" lamp)

Warranty

Lifetime warranty / 1-year UV Lamp warranty See warranty statement for complete details
