

Ultravation®

ProgressiveMedia™

Whole House Media Air Cleaners for HVAC

Cleaner air for your home

**Premium air filtration
for capturing 99% of particles
5 microns or larger**

**High capacity • High efficiency
MERV 11 and MERV 13**

**ProgressiveMedia™ gives you
healthier air and helps you save
energy, too! (more inside)**

ProgressiveMedia™ Whole House Air Cleaning

Today, indoor air is often more polluted than outdoor air, due largely to advanced construction and renovation techniques that create the benefit of tighter, more efficient houses. Tighter houses though, tend to trap airborne microorganisms, allergens and debris. Most indoor air pollution is made up of microscopic particles including smoke, fine dust, bacteria, viruses—and allergens. The accumulation of these elements can cause inside air to be as much as 100 times more polluted than outdoor air at times.

Advanced filter design captures an ultra-wide range of indoor air pollutants

ProgressiveMedia™ layered air filter design collects particles—large to small—through the entire thickness of the filter, instead of simply piling debris up on the leading edge.

Ultravation®

Better Air | Better Water | Better Living™

The ProgressiveMedia™ Straight-through design media air cleaner cabinet with cartridge installed.

The ProgressiveMedia™ long lasting, easy to change MERV 11 and MERV 13 filter cartridges.

Designed specifically with allergy sufferers in mind. . .

Easy, Practical and Worry Free: Simply, Clean Air

Exceeding the standard—creating a great filter

ProgressiveMedia™ is a proven, standard design whole house air cleaner with well above standard air cleaning capability. A closer look reveals why:

Almost 30 sq ft of hypo-allergenic, layered filter media!

That's how much filter is folded into an ProgressiveMedia™ five-inch pleated filter cartridge. Long life, exceptional dirt holding capacity.

UltraStrand™ fibers with electrostatic charge

ProgressiveMedia™ filters feature UltraStrand™ shaped fibers that enable the filter to capture particles as small as 0.3 microns (MERV 13) very effectively, and it is an important element to the filter's high efficiency, long life and excellent small particle capture. UltraStrand™ fibers are hypo-allergenic, continuous, 100% synthetic and have a permanent electrostatic charge that attracts and traps very small particulates in tiny grooves, edges and pockets.

Exclusive shaped fibers

99% efficiency on pollen capture

Pollen is easily captured with ProgressiveMedia™. Many other irritants and allergens are removed from the airstream as well—not to mention lots of dust and dirt!

Saving energy while excelling at cleaning the air

Designed for high capture efficiency with very low air restriction, ProgressiveMedia™ MERV 11 filters have no more air restriction than a MERV 8 filter but remove 40% more dirt! Also available in MERV 13, see below.

Fewer trips to the landfill

Filter cartridges can last from six months to a full year!

Simply practical

The superior filtration performance of ProgressiveMedia™ is obtained without electricity, ozone generation, or the frequent maintenance required with electronic and other design air filters.

Available MERV 11 or MERV 13 Filter Efficiency Rating

MERV 11 Professional Series		MERV 13 Premium Series	
Particle size in microns	Efficiency	Particle size in microns	Efficiency
0.3 to 1	—	0.3 to 1	75%
1.0 to 3	65%	1.0 to 3	90%
> 3	85%	> 3	90%

What's MERV?

MERV stands for Minimum Efficiency Reporting Value. It is the industry standard filter performance rating system as developed by American Society of Heating, Refrigerating and Air-Conditioning Engineers.

The illustration above indicates the performance of both ratings.

Nearly 30 square feet of ProgressiveMedia™

hypo-allergenic filtration captures particles in layers, maximizing filter capacity and efficiency. Ultravation® UltraStrand™ shaped fibers capture and hold much smaller particles than typical filters.

ProgressiveMedia™ Filter Efficiency

Ultravation® ProgressiveMedia™

Provides high efficiency cleaning as soon as it is installed. Then, over a minimum life span of six months, will require no maintenance and steadily improve in efficiency as it fills. ProgressiveMedia™ is not air velocity dependent.

Flat furnace filters only offer good efficiency very late in their 30 day life span. They have low holding capacity, and fill quickly requiring replacement purchase at least six times more often.

Electronic Air Cleaners (EAC) are velocity dependent and lose the ability to capture particles as blower speed is increased, and as the plates become coated. Unlike media filters, they do not gain in efficiency during use, and some need to be cleaned as often as every 40-50 hours in the dishwasher to maintain adequate efficiency.

What will your Ultravation® filter catch?

Simply, Clean Air

Models for all HVAC systems

Ultravation®

ProgressiveMedia™

Whole House Air Cleaning for HVAC

Ultravation® ProgressiveMedia™ air cleaners are built to last

We manufacture the cabinets that house our ProgressiveMedia™ filters to the same quality standards as our high performance filter media. Built with 100% U.S. origin, galvanized steel and painted with a rugged powder coat finish, we back all of our cabinets with a TEN-YEAR

warranty. (See warranty card for complete details.)

How to Buy

ProgressiveMedia air cleaners are installed by HVAC contractors who will advise on the best model for your HVAC system. Your contractor will find our products at the nation's leading HVAC wholesale distributors.

Extend your ProgressiveMedia™ filtration! Create a comprehensive indoor air quality improvement system with UVPhotoMAX™

Add a UVPhotoMAX PCO air purifier to create an unbeatable whole house Indoor Air Quality (IAQ) system that “super-cleans” the air!

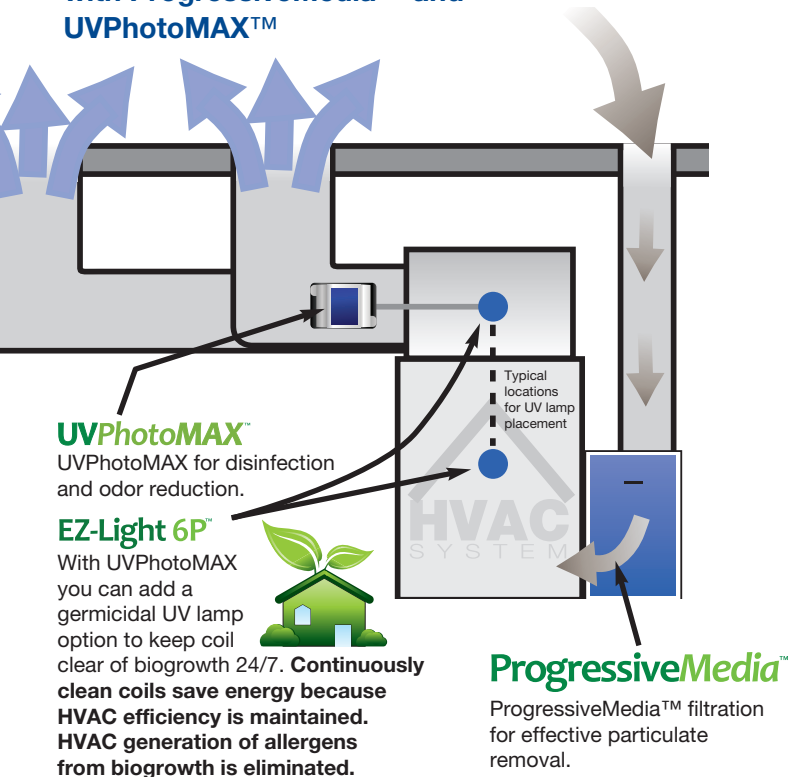

UVPhotoMAX:

- **Kills airborne bacteria/viruses in the HVAC airstream**
- **Breaks down odors, VOCs and airborne organics**
- **Reduces HVAC-generated allergens**
- **Eliminates biogrowth on HVAC cooling coil and other surfaces with EZ-Light 6P™ UV light option**

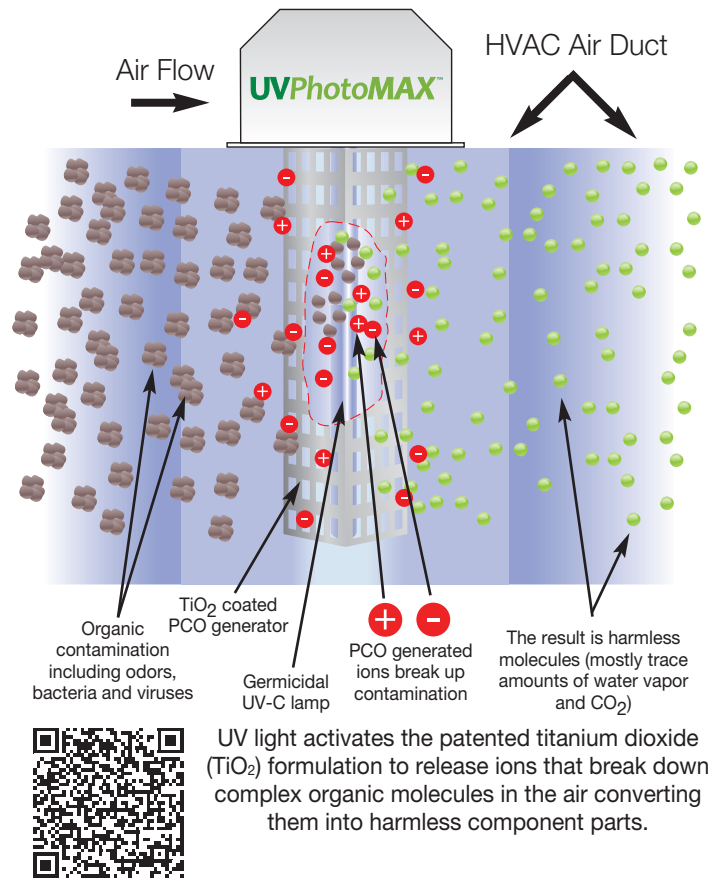

Photocatalytic oxidation (PCO) air cleaning picks up where filters leave off. This advanced oxidation system is compact yet very powerful. It's an air purifier that does what filters can't: Working at the molecular level, it breaks down VOC odors, airborne germs and toxic chemicals.

How to build a complete IAQ system with ProgressiveMedia™ and UVPhotoMAX™
